The **Mimotopes - Genzyme Pharmaceuticals** Global Alliance

Two innovative global businesses, Mimotopes and Genzyme Pharmaceuticals, have now joined forces to be your single partner at every step in the peptide drug development continuum from design of peptide libraries, through to cGMP manufacturing of active pharmaceutical ingredients (APIs) and commercialization.

THE MIMOTOPES-GENZYME PHARMACEUTICALS GLOBAL ALLIANCE ENSURES

- Expert application of peptide technologies and know-how in all development stages
- Seamless progression of technical information from candidate discovery through clinical development
- Improved efficiencies from design to commercialization
- Enhanced protection and confidentiality of Intellectual Property

COMBINED CAPABILITIES

Researchers and organizations developing peptide therapeutics or diagnostics now have a single point of contact to utilize the newly combined products and services of the Mimotopes-Genzyme Pharmaceuticals Global Alliance:

- Peptide libraries for screening applications
- Custom, modified, and labeled peptides for Research and Development
- Immunoassay based products and services
- Design and discovery of peptide based drug candidates
- Process feasibility study and development
- Analytical development and validation
- Manufacture of peptide APIs in a cGMP facility
- Quality assurance and regulatory filing support

MIMOTOPES

Mimotopes is a global leader in high quality research-grade peptide products and applications for the drug discovery industry. As the innovator of peptide library production, with our unique and proprietary SynPhase™ platform and technical expertise, Mimotopes has over 18 years experience developing solid-phase synthesis technology for peptides and discovery chemistry.

GENZYME PHARMACEUTICALS

Genzyme Pharmaceuticals, a business unit of Genzyme Corporation, is a premier business partner in the process development, cGMP manufacturing, and regulatory support of pharmaceutical materials and APIs focusing on peptides, peptidomimetics, peptide intermediates, and peptide drug delivery.
